Content

- The Desktop
- The Start Menu
- The Taskbar
- File Explorer
- Control Panel

What is Windows?

- Windows is a popular operating system used by millions of people worldwide.
- It provides a graphical user interface (GUI) for interacting with your computer.

Key Components of Windows

Desktop:

The main workspace where you interact with applications.

Start Menu:

The primary way to access programs, settings, and files.

Taskbar:

Located at the bottom of the screen, it shows running applications and provides quick access to common tools.

The Desktop

Elements:

Icons: Shortcuts to files, folders, and applications.

Recycle Bin: A temporary storage area for deleted files.

Taskbar: Located at the bottom of the screen.

The Start Menu

Search bar: Quickly find programs, files, or settings.

Most used apps: Frequently used applications.

All apps: A list of all installed applications.

Power options: Restart, shut down, or sleep.

The Taskbar

- Shows running applications.
- Provides quick access to common tools (clock, search, etc.).
- Allows switching between open applications.

File Explorer

File Explorer is the tool used to manage files and folders on your computer.

Functions:

- Navigate through folders and files.
- Create, rename, move, and delete files.
- Organize files into folders.

Creating and Renaming Files and Folders

Steps:

Right-click in the desired folder.

Select "New" and choose "Folder" or "Text Document."

Right-click on the file or folder to rename it.

Moving and Deleting Files

Steps:

Drag and drop files to a different folder to move them.

To delete a file, right-click on it and select "Delete."

Organizing Files with Folders

- Creating folders helps keep your files organized and easy to find.
- Best Practices:
 - ✓ Use descriptive folder names.
 - ✓ Create subfolders for related files.

Control Panel

- Control Panel is a central location for configuring Windows settings.
- Categories:
 - System and Security: Manage hardware, software, and security settings.
 - Network and Internet: Configure network connections and internet settings.
 - Hardware and Sound: Manage devices and sound settings.
 - Appearance and Personalization: Customize the look and feel of Windows.

Personalizing Your Desktop

Options:

- Change wallpaper.
- Adjust screen resolution.
- Customize colors and themes.
- Add gadgets or widgets.

Managing User Accounts

- Create separate accounts for different users on the computer.
- Options:
 - Create new user accounts.
 - Change account settings.
 - Manage administrator privileges.

Troubleshooting Common Windows Issues

- Common Problems:
 - Slow performance.
 - Application crashes.
 - Internet connection issues.
- Troubleshooting Tips:
 - Restart your computer.
 - Check for updates.
 - Run antivirus scans.
 - Clear browser cache and cookies.

Summary

- Windows is a popular operating system.
- The desktop, Start Menu, and Taskbar are essential components.
- File Explorer is used to manage files and folders.
- Control Panel is used to configure Windows settings.

Additional Resources

- Recommended Websites:
 - Microsoft Support website
 - Online tutorials and courses

Exercise

- Task: Create a new folder on your desktop and move some files into it.
- Task: Change the background image on your desktop.
- Task: Create a new user account for a family member.

Quiz

Test Your Knowledge

- What is the main purpose of the Start Menu?
- How do you create a new folder?
- What is the Control Panel used for?

Quiz Answers

- The Start Menu is used to access programs, settings, and files.
- To create a new folder, right-click in a folder and select "New" > "Folder."
- The Control Panel is used to configure Windows settings.

Thank You
