

Personal development

Sgl1

Wheel of life

What is Personal Development?

Personal development includes activities that improve awareness and identity, develop talents and potential, build human capital and facilitate employability, enhance quality of life and contribute to the realization of dreams and aspirations.

The concept is not limited to self-help but includes formal and informal activities for developing others in their roles

There is no single model that's right for everyone

The tires have a good qualities and be circular is not enough also the road is important.

By categorizing life aspects one can **have a clear visual** representation of his/her life

By knowing strengths and weaknesses one can **manage his/her life better**.

Sgl2

Stress management

Stress can be defined as our mental, physical, emotional, and behavioral reactions to any perceived demands or threats.

When situations seem **threatening** to us, our bodies react quickly to supply protection by preparing to take action. this is called **fight or flight response**.

These are makes things stressful ↓
(Demands, imminent, life transitions, time running, ambiguity, desirability, controllability)

- **Not all stress is bad**

Distress (bad stress) is a continuous experience of feeling overwhelmed, oppressed.

Eustress (good stress) is the other form of stress that is positive and beneficial.

Taking a test for many people is a stressful situation.

-we stress out, because we perceive a situation as a dangerous, difficult or painful.

Suggestions for reducing stress

- 1- find a support system
- 2- change your attitude
- 3- be realistic
- 4- get organized and take charge
- 5- take breaks, give yourself time
- 6- take good care of yourself
- 7- learn to say "no"
- 8- get regular exercise
- 9- get a hobby, do
- 10- slow down
- 11- laugh, use humor
- 12- learn to relax
- 13- deep breathing
- 14 – visualization
- 15- muscle relaxation

- find someone to talk with
- find other ways to think about stressful situation
- set practical goals for dealing with situations and solving problems.
- being unorganized or engaging in poor planning often leads to frustration or crisis situation.
- taking time to yourself is important at minimum, take short breaks during your busy day.
- eat properly, get regular rest, allow your self to do something you enjoy.
- learn to pick and choose which things you will say "yes" and which things you will say "no", don't accept every request or opportunity that comes your way
- exercising regularly help relieve some symptoms of depression
- for a balanced lifestyle, play is as important as work
- know your limits, and cut down on the number of things you try to do each day
- do something fun and enjoyable such as seeing a funny movie, laughing with friends.....
- develop a regular relaxation routine like: yoga

Sgl3

Positive change and comfort zone

Just read and understand it is very easy

-Around 87% of illnesses is your thoughts is live, and approximately 13% to diet, genetics and environment.

-toxic emotions can cause migraines, hypertension, stroke, cancer, skin problems, diabetes, infections and allergies.

-There is a **law in psychology** that if you form a picture in your mind of what you would like to be, and you keep and hold that picture there long enough, you will soon become exactly as you have been thinking. -**William James-**

- Your life is directed by your thoughts.
- Your thoughts create your behavior.
- Your thoughts affect the chemistry in your brain.
- Your thoughts and your emotions are closely linked.
- Toxic thoughts create negative emotions.

-You are what you think.

What you live today is the result of your yesterday's thought, and what you will live tomorrow is the result of your today's thought.

The **law of substitution** says, your mind can only hold one thought at a time, you can substitute a positive thought to a negative.

The **LAW of habit** says: any thought or action that you repeat over and over, will become a **new habit**.

The **law of attraction** says that : you are a living magnet and that you invariably attract into your life the people, idea, opportunities, and circumstances in harmony with your dominant thoughts.

You probably have things about yourself you wish you could change , **some of those things can be changed and some can't**, you don't have to feel unhappy about the things you can't change.

Negative feelings are caused by negative thoughts.

The easiest way to stop feeling miserable(sad) is to change thought about the thing that is bothering you.

Instead of feeling bad choose one of two things Change the things that bother you or change your thoughts you don't like.

It is important to be happy

Unlock the door to your happiness

Focus on the things and feelings that make you happy and write them down in the boxes

Being positive doesn't make you better; it makes everyone around you better.

We are not positive because life is easy. We are positive because life can be hard

Being positive won't guarantee you'll succeed but being negative will guarantee you won't

Positive thinking doesn't mean that you live in a world of rainbows and unicorns, where ignore life's less pleasant situations.

Positive thinking means that you respond to uncomfortable or unpleasant situation in a more positive and optimistic way

in Comfort zone you Learned helplessness

in combination with the comfort zone, creates a person who feels trapped and helpless, weak and powerless, and unable to take control or to make any real difference in his life, and fear, self doubt

It's time to leave your comfort zone

Get comfortable with doing uncomfortable things

Staying comfortable

It limits your growth

It limits your experiences

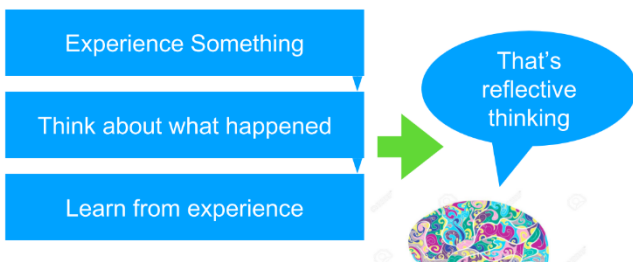

Someone may move your cheese

Sgl4 Reflection

Reflective learning is about providing students the scope to consider develop and analyse their learning experiences, and plays a crucial role in your learning and self development.

Word 'reflection' is latin origin
Means: 'to bend' or 'turn back'

What is reflection

When you miss a lecture then thought next time you will leave the house 30 minutes earlier.
This is **reflection** example

You need to be actively aware of, to develop, and practice the habit of reflection, until it becomes almost second nature.

Life experiences acts as a prompt for reflection.

Reflective thinking can be defined is: consciously analyzing: what you are currently doing, what you have previously done, what you have experienced, what and how you have learned.

Reflective thinking: is the notion of awareness of one's own knowledge, assumptions and past experiences.

Reflection is:

	Self Awareness Thinking of yourself, your experience, and your view of the world
	Self Improvement Learn from experiences and wanting to improve some areas of your life
	Empowerment Putting you in control and making changes and behaving in a different way

- Reflection results in learning
- Reflection is an active and dynamic process
- Reflection is not a linear process, but cyclic
- Reflection encourages looking at issues from different perspectives

Models of reflection:

- 1- Kolb's learning cycle
- 2- Schon's model

Example of using Kolb's learning cycle

- **Experience**

You give a 5 minute presentation in class and received low marks for presentation style.

- **Observations and reflections**

You over ran the 5 minutes and kept forgetting what you wanted to say.

- **Development of ideas**

You spoke to your lecturer and the Learning Skills tutor to get some advice on presentation techniques. You noted down some ideas on how to prepare differently next time.

- **Testing ideas in practice**

You prepared your presentation in advance. You had some notes to refer to. You practiced delivering your presentation within 5 minutes.

Schon's model example:

- **Reflection in action** Thinking while doing

- You are in a lecture and keep being distracted by thinking about what to have for lunch!
- You want to get the most from the lecture so need to find a way to help you focus.
- You decide to start making some notes of the key points.

- **Reflection on action** Thinking After doing

- You notice that sometimes after a lecture you can't remember what was covered.
- You find out about the lecture topic in advance and write down some questions you want answered.
- You make notes during the lecture to help you focus.
- You arrange to go for a coffee after the lecture and talk with your peers about what was presented, to help you understand and form your own opinions.
- You file your lecture notes and any handouts.

Tools to support reflective learning

- 1- learning journals, diaries, log books.....
- 2- list, bullet points, tables.....
- 3- audiobisual recordings....
- 4- busual representations

Reflection leads to:

Better understanding of our strengths and weaknesses, acknowledgment of our fears, identification of possible inadequacies or areas for improvement.

Reflective medical practice means:

- 1- evaluate your interactions with patients and team members
 - 2- using the results of self
 - 3- evaluation to influence future.
-

For medical reflection practice, you need to:

- 1- reflective notebook
 - 2- a framework
 - 3- supervisor
-

Reflection:

Broadens knowledge

Develop skills

Change attitudes (acquire new insights)

We don't learn from experience we learn from reflecting on experience. -John Dewey-

Reflection in medical education

- reflection for learning
 - reflection to develop therapeutic relationship
 - reflection to develop professional practice
-

Personal development plans:

- 1- identification of learning needs
 - 2- developing a plan
 - 3- measurable learning outcomes
-

Example 1

- I fell off my bike and hit my head on the concrete
 - Lesson: I am not good at riding a bike
 - Lesson: I hurt my head but my helmet saved my life
 - Lesson: A lady came to help me because my arm was badly grazed
 - Reflection: When riding a bike be careful, use a helmet and take help from people.

Sgl5

Time management

time management is under our control

time is life and life is time

time is precious

doing the right thing at the right time is **time management**.

Time management is the act or process of planning and exercising conscious control over the amount of time spent on specific activities, especially to increase effectiveness, efficiency or productivity.

Poor time management (common problems) is happening because of giving excuses to your self:

I am busy....

I don't have time....

I am not happy with my life....

Always say tomorrow

Most common time wasters

- Lack objectives, priorities, daily plan
 - Attempting too much at once
 - Leaving task unfinished
 - Inability to say "no"
 - Lack of self discipline
 - Crises management
 - Meetings
-

Advantages of time management

- Reduces your stress level
 - Help you remain focused on the task
 - Minimizes procrastination
 - Augments your productivity
-

Time management is important for various reasons, such as:

1-Saving time

2- plan all your tasks effectively

3-Organize your days and weeks

4-Perform all important activities

5-Helpful in setting goals

6- helps to take rapid actions when opportunities and crisis arise

Procrastination is the tendency to avoid or delay acting upon a task under one's immediate control.

Procrastination persistently postpone and avoid completing a task or making a decision.

Procrastination comes from the **latin**
Pro means forward , **crastinus** means tomorrow

The primary manifestations of procrastination is excessive sleeping play computer games, watching TV, shopping online, alcohol and othe drugs.....

25 to 75 percent of college students procrastinate on academic work.

Causes:

Personality – Psychological

Fear of Failure

Perfectionism want to be the best in the sub

Low self-esteem

Hoping someone else will do it

Social-Situational

Lack of skill

No deadline

Overwhelmed

Too little to do

Procrastination Leads To

- Wasted Time
- Missed Opportunities
- Poor Performance
- Self-Deprecation
- Increased Stress

Tomorrow is too late, yesterday is over and now is exactly the right moment to start.

	URGENT	NOT URGENT
IMPORTANT	DO NOW	DO NEXT
NOT IMPORTANT	DO LATER OR DELEGATE	IGNORE

Time management skills for college students:

Set your goals effectively

Prioritize your work

To do list at the beginning of the day.

Know yourself better

Delegate your task

Motivation is important element

Avoid doing many things or multitasking

Need patience and forgiveness

Working in a harmonious balance

Give yourself deadlines

Be assertive and learn to say 'NO'

SUMMARY

How do university students manage their time?

Here are 7 time management tips for students:

- Eliminate distractions. Get rid of anything that distracts you and allows you to procrastinate from your work. ...
- Be focused at the task at hand. ...
- Use a calendar. ...
- Use a checklist. ...
- Get organized. ...
- Schedule rewards. ...
- Get a good night's sleep.

Sgl6 SWOT Analysis

What is SWOT analysis?

- The concept was given by **Albert Humphrey** (1960s) and was initially used by organizations to evaluate their current position and develop strategic planning.
- **SWOT Analysis**
a technique used for **planning** and **problem solving**, and helps in **exploring your strengths, abilities, motivations, weaknesses** and **how they play an incremental part** in your career.

What is SWOT analysis?

- It is necessary for a **successful life**.
- It is a powerful process for **evaluation**
- for a student, it implies **the parts they are good at** and **factors that need improvement**.

SWOT Analysis will give opportunity to reflect and identify your personal characteristics that helps you to achieve and expand your learning objectives within the workplace

SWOT is an **acronym** for :

S- Strengths W- weaknesses

O- opportunities T- threats

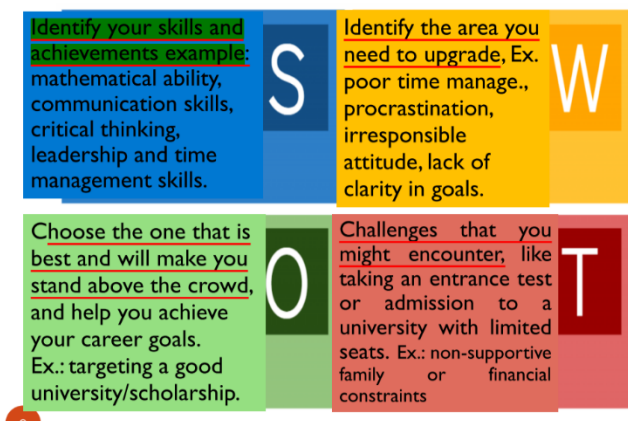

■ It is a process which gets the data about your:

- ✓ Internal **Weaknesses** and **Strengths**
- ✓ External **Threats** and **Opportunities**

It can be useful for those who are:

- 1- searching for job.
- 2- climb the ladder of success.

The SWOT analysis:

Strengths are internal positive power or capabilities a student has control over and can make full use of.

Ex: I have strong communication skills....

Weaknesses are internal negative aspects and attributes which have little control over.

Ex: what do I not do well...?

Opportunities are uncontrollable external events a person can potentially leverage.

Ex: what trends do I see in my professional area...?

Threats are uncontrollable external factors that might overcome or damage the strengths and opportunities.

Ex: what obstacles do I face...?

The importance of performing a student the SWOT Analysis:

- Making correct decisions for exploring various opportunities.
- Having a clear understanding of your goals.
- Making changes in the plan to accommodate possibilities.
- Understanding choices to counteract threats.
- Keeps you aware of the shortcomings and acts as a motivation.
- Help in utilizing available resources to the best of your ability.
- Reviewing options and prioritizing accordingly.

Results:

Self-confidence,

Self-esteem,

Self-image,

Writing SOWT Analysis for students:

1- identify goals:

identify the end goal, but that must be achievable and reliable.

2- identify strengths and weaknesses :

3- identify opportunities:

4- identify threats:

5- **Prioritize:**

- Once complete, **review the probe and make changes if required.**
- Viewing the SWOT should give you a clear understanding of what you need to **prioritize.**
- Look at all four areas of the SWOT analysis and **start working towards your goal accordingly.**

Conclusion:

- SWOT analysis can be a useful **Self-Assessment** tool that can help you in **personal development.**
- The extent of improvement depends not on the results of the analysis but on your own **Motivation to Change.**

10 core basics of a SWOT analysis:

- 1 Give yourself a purpose
- 2 Come up with as many questions as possible
- 3 Ask others
- 4 Don't be afraid to admit your weaknesses
- 5 Don't duplicate (a weakness can't be a strength too)
- 6 Threats before opportunities
- 7 Take action
- 8 Monitor your SWOTs progress
- 9 Continue to update
- 10 Don't procrastinate
