

Hawler medical university College of Medicine

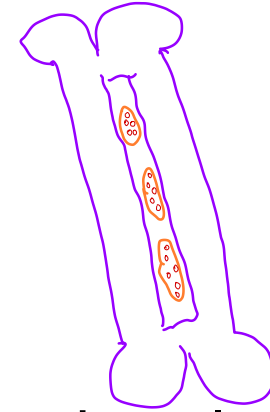

MEDICAL TERMINOLOGY

Outlines and objectives

- To be able to describe different disease, signs and symptoms by single medical words
- To be able to describe and understand different surgical procedures and terms
- Be able to understand different medical branches and departments

Examples:

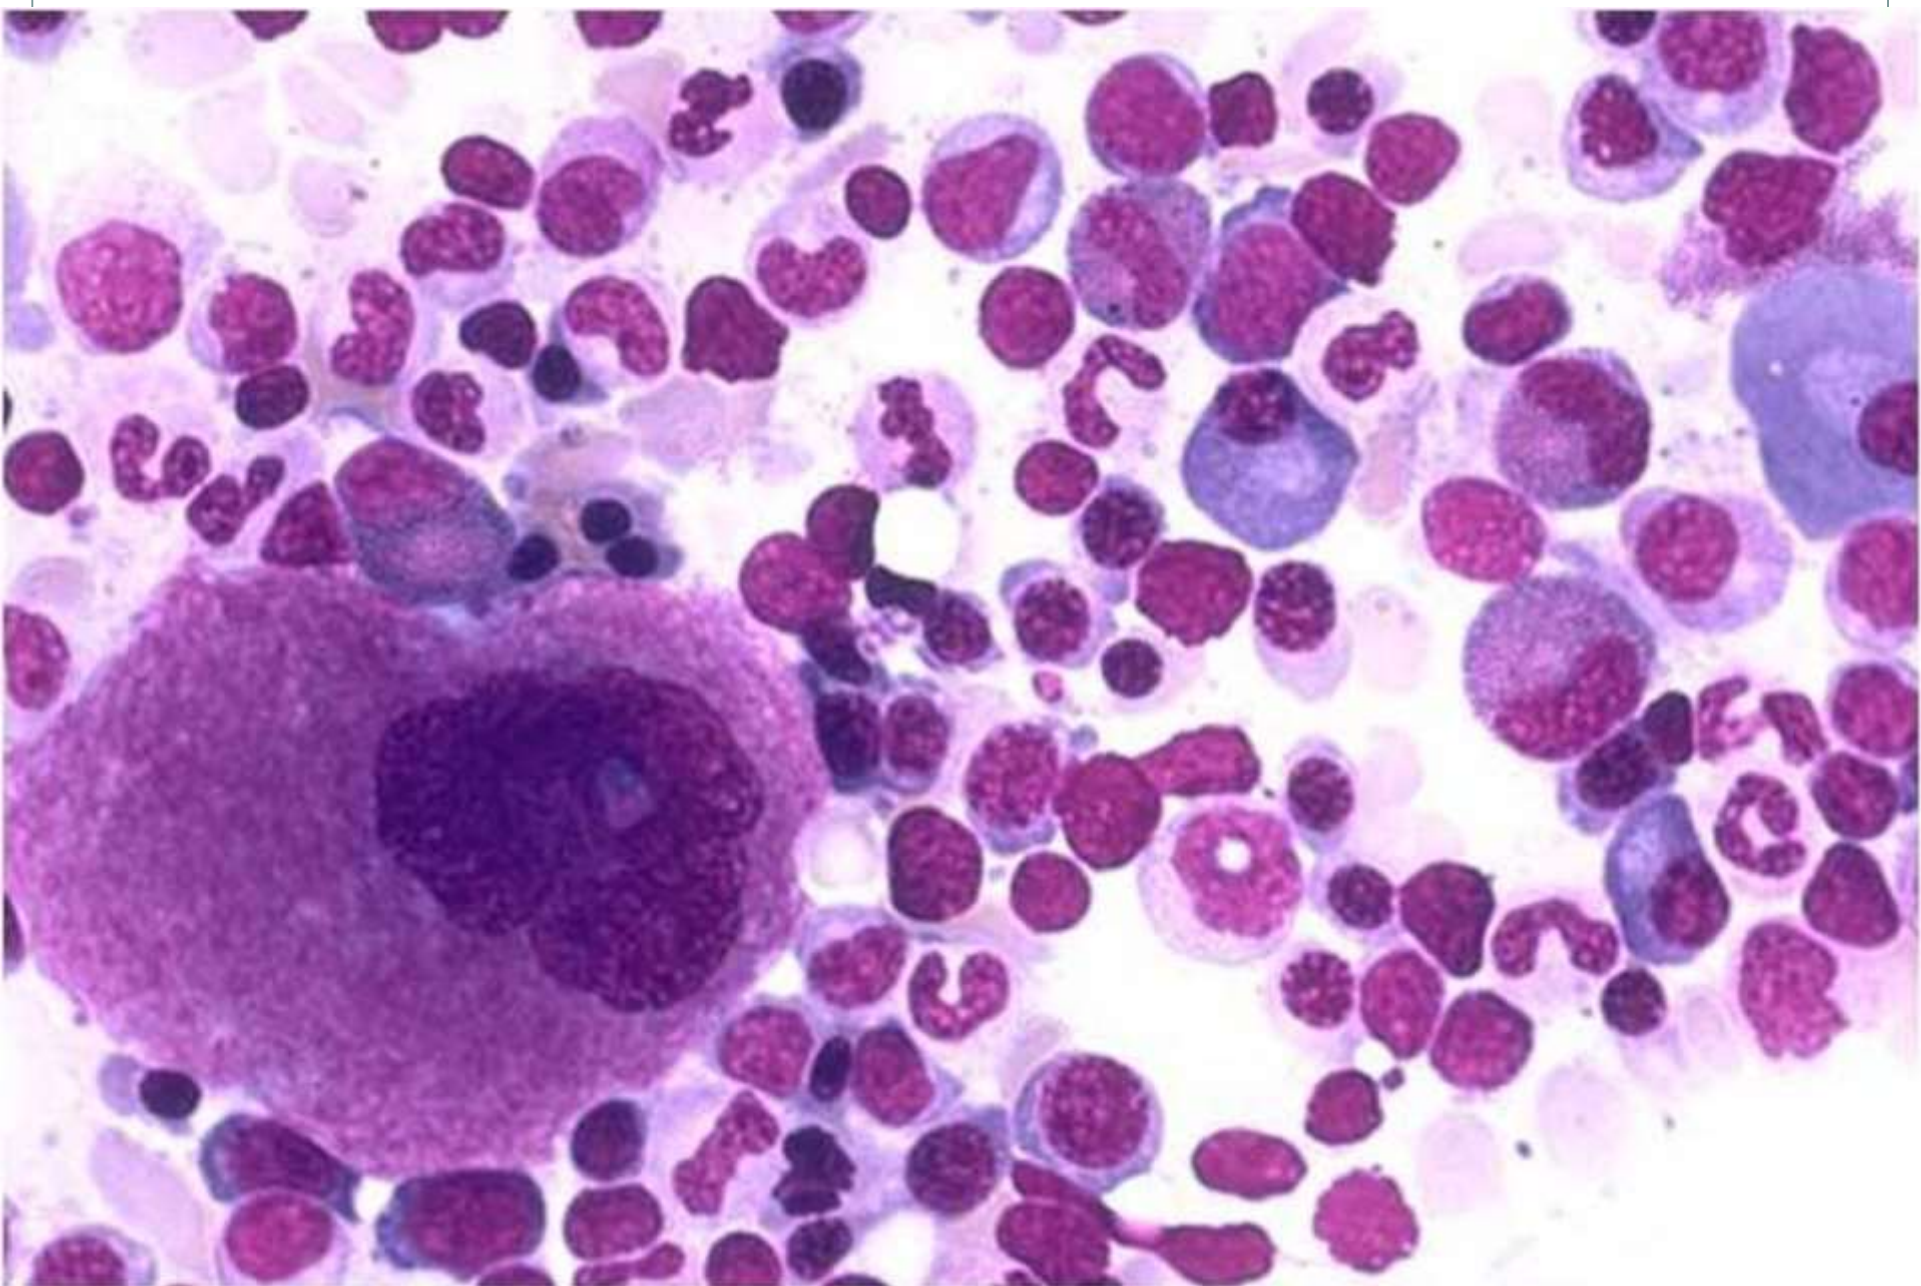

Megakaryocyte is a large cell with multilobulated nucleus in the bone marrow that produces **blood platelets**.

Megalomania is mania of grandiose performance = جنون العظمة.

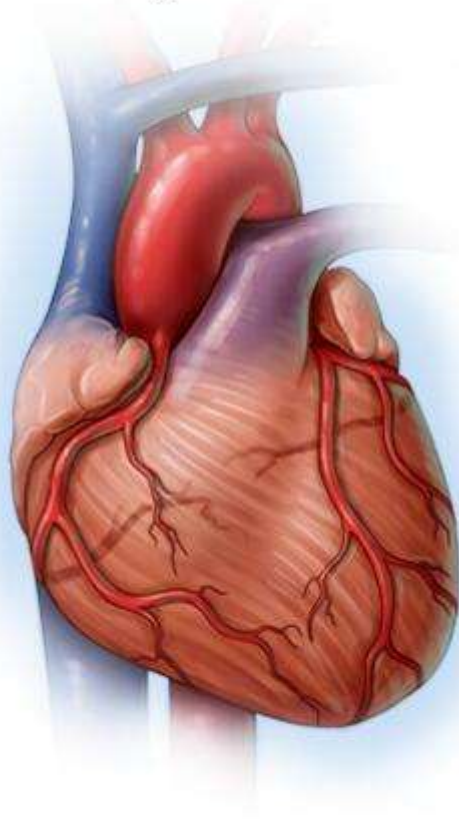

Splenomegaly: Enlarged spleen.

Hepatomegaly: Enlarged liver.

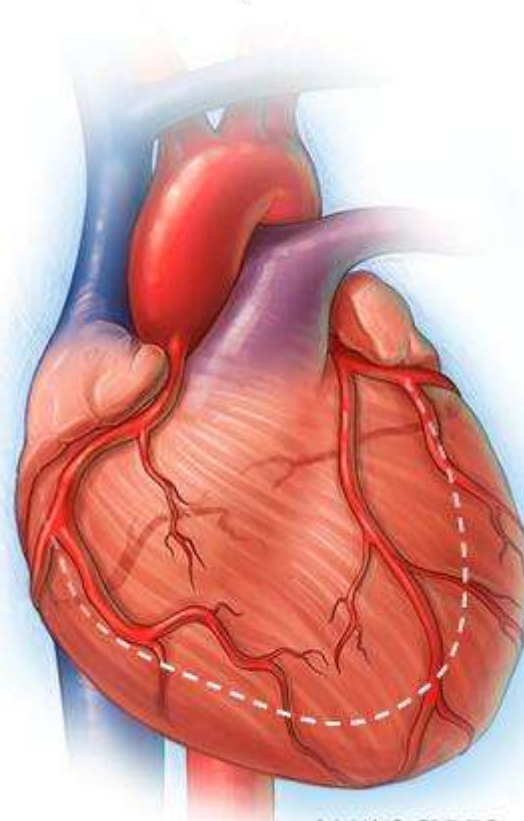

Cardiomegaly: Enlarged heart.

Typical heart

Enlarged heart

Examples

- Orthopaedics is that medical science that deals with the treatment of skeletal deformities جراحة الكسور والعظام.
- Orthodontics is a branch of dentistry that deals with irregularities of the teeth and their correction.

PSEUDO = False. Examples:

Pseudopregnancy: false pregnancy.

Pseudoarthrosis: False joint on fibrous union of a fracture.

RE = Again. Examples:

Reuse: use again.

Recur: comes back.

Redistribution, recalculation, rearrange, restudy, etc.

SCLERO = Hard. Examples:

Scleroderma: A skin disease characterized by skin hardening.

Sclerotic stroma: Hard fibrous stroma.

False Pregnancy / Pseudocyesis

- ***SCLERO*** = Hard. Examples:
- Scleroderma: A skin disease characterized by skin hardening.
- Sclerotic stroma: Hard fibrous stroma.
- **OMNI = All**
- Omnipotent: Having unlimited power or authority.
- Omnivorous: Feeding on both animals and plants.

PAN = All

Pandemic: Affecting a large number of individuals over a wide geographic area. (Spanish flu)

Pancytopenia: Reduced all blood cells (Anemia, leukopenia and thrombocytopenia).

Just RBC

Pancarditis: Inflammation of all layers of the heart (endocardium, myocardium and pericardium).

AUTO = Self

Autolysis: Breakdown of a tissue by its own cellular enzymes.

Autoimmunity: Mounting an immune response against self-antigens.

Autoantibody: An immunoglobulin reactive against self-antigen.

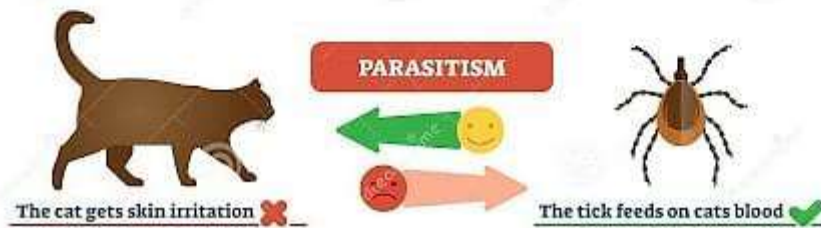

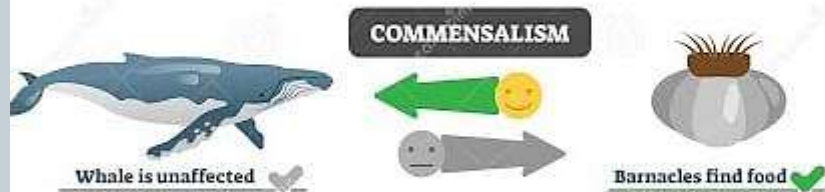

Autograft: A tissue or an organ transplanted from one part to another of the same body.

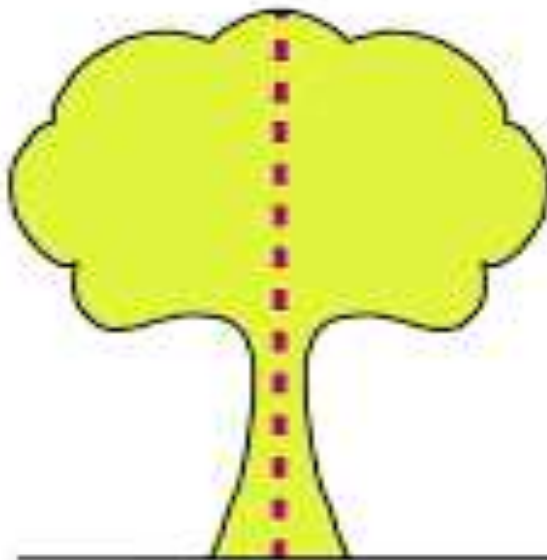

- **SYM = Together.**
- Symbiosis is the state of living together of two dissimilar organisms in an intimate relationship of mutual benefit.
- Symmetry is the correspondence in size, shape and relative position of parts on opposing parts of a dividing line, axis, or plane (e.g. bilaterally symmetrical).

SYMBIOSIS

Symmetrical

Asymmetrical

Chaos is not symmetrical

SYN = With or at the same time.

Synchronous: Existing or happening at the same time.

Synergism: Interaction of agents or drugs such that the additive effect is greater than the sum of their individual effects (e.g. the synergistic effects of smoking and asbestos in predisposition to lung cancer).

Synonym: Words or expressions having the same meaning or significance.

Syndrome: A group of signs and symptoms that occur together and characterize an abnormality.

- **Tele: Distant, far.**
- Telephone: An instrument that reproduces sounds at a distance.
- Telescope: An optical instrument for viewing distant objects.
- Telepathy: Apparent communication of one mind to another by extrasensory mean. Reading other people's thoughts.

ULTRA = beyond what is ordinary.

Ultracentrifuge: A high-speed centrifuge able to sediment colloidal and other small particles.

Ultrasonic: Compression waves or vibrations having a frequency above the human ear's audibility.

CONDITIONS:

Esthesia = Feeling, sensation.

Anaesthesia is loss of sensation with or without loss of consciousness.

Paraesthesia is prickling or tingling sensation.

XERO = Dry

Xerosis: Dryness.

Xerostomia: Dry mouth.

Xeroderma: Dry skin.

Xerophthalmia: Dry eyes.

خشکی درونی به پخش رادیو
و آب میخورن به سر میخورن

- **Malacia = Softening**
- Osteomalacia: Softening of bone in vitamin D deficiency.
- Myomalacia is softening of muscle as due to ischemic necrosis.
- **Opia = Vision**
- Diplopia: Double vision.
- Myopia: Short sightedness.
- Hypermetropia: Far sightedness.

Penia = Decreased, low.

Thrombocytopenia is the decrease of platelets in blood.

Leukopenia is decreased white blood cells in blood.

Pepsis = Digestion

Dyspepsia is indigestion عسر الهضم

- Algia = Pain
- Arthralgia is joint pain.
- Myalgia is muscle pain.
- Neuralgia is pain of neural origin.

What is the
different between
Dynia

- **Algesis, algesia = Sense of pain.**
- Analgesia is insensitivity to pain with or without loss of consciousness.
- Analgesics are drugs that alleviate pain.

Asthenia = Weakness, debility.

Asthenic: weak.

Thromboasthenia: Platelets dysfunction.

Myasthenia is muscle weakness.

Dynia = Pain. *The pain is suggestive of an origin and is not a chronic pain*

Pleurodynia is pain of pleural origin.

Cardiodynia is pain of cardiac origin.

- **Emia = Blood.**
- Hypoglycemia is reduced blood sugar.
- Hyperuricemia is increased uric acid in blood.
- Toxemia is circulating toxins in blood.
- Septicemia is circulation and proliferation of virulent bacteria in blood.

Vasculimja

Phagia = Eating

Dysphagia is difficulty in swallowing. 

Macrophage is a large phagocytic cell derived from blood monocytes.

Phagocytosis is the engulfment of particulate matter by phagocytes usually associated with their destruction.

Phasia = Speech.

Aphasia is loss of speech.

Dysphasia is difficulty of speech.

Phobia = Fear

Photophobia is fear of light as in photosensitivity.

Claustrophobia is fear of closed places.

Cancer phobia is hysterical fear of cancer.

Plegia = Paralysis

Paraplegia is paralysis of lower half of the body.

Hemiplegia is paralysis of one half of the body.

Tension = Pressure

Hypertension is increased blood pressure.

Hypotension is reduced blood pressure.

Uria = Urine

Polyuria is increased frequency of urination.

Dysuria is difficulty and pain during micturition.

Hypercalciuria is increased urinary excretion of calcium.

Hematuria is voiding of bloody urine.

- **Allergy** = Hypersensitivity reaction to foreign substances
ex. Food allergy, drug allergy, etc, (IGE ↑)
کوبادین
- **Allergen** is a substance that induces allergy (=allergenic).
- An **allergic** person is one affected by hypersensitivity.

THANK YOU
