MEDICAL TERMINOLOGY

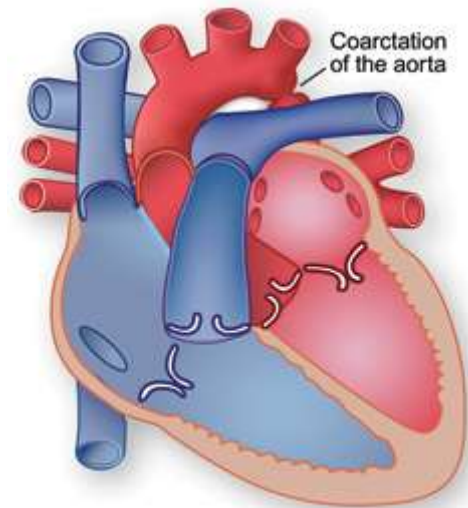

Outlines and objective

- To be able to understand and define
different medical terms
- To be able to describe different medical conditions

Ascites is the accumulation of fluid in peritoneal cavity as in disseminated malignancy to peritoneum, liver cirrhosis, tuberculous peritonitis, etc.

نازما

Coarctation is compression of the wall of a vessel as in the congenital coarctation of the aorta.

Hernia is the protrusion of an organ or part through connective tissue or the wall of a cavity in which it is normally enclosed as in inguinal hernia, umbilical hernia, incisional hernias at site of surgical scars, etc.

Ischemia is the reduction in blood supply to an organ or tissue as in myocardial ischemia due to coronary artery atherosclerosis.

- 
- **Frequency** is the number of repetitions of a periodic process in unit time.
 - It is also the state of being frequent.
Frequency of urination describes polyuria.

- **Jaundice** is the yellowish discoloration of skin and sclera of the eye in
- **hyperbilirubinemia**. (Bilirubin is a pigment product of hemoglobin metabolism synthesized by the liver).

Laceration is an irregular wound or tear. Severe blunt trauma can induce laceration in skin, liver, etc.

Pruritis is an itching sensation of the skin. Ex. Pruritis ani (at the anal verge), Pruritis vulvae, etc.

A suffix that means a disease producing condition is **(iasis)**, for example:

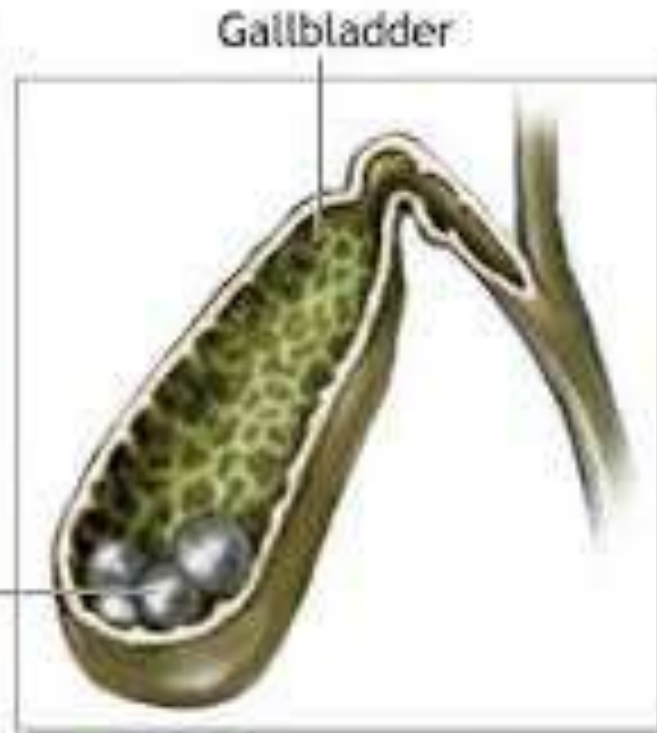

- 
- **Cholelithiasis** means stones in the biliary passages.
 - **Urolithiasis** means stones in the urinary passages.
 - A suffix that means **inflammation is (itis)**. For example:
 - **Meningitis** is inflammation of the meninges.
 - **Appendicitis** is inflammation of the vermiform appendix

Cholelithiasis

Gallstones in
gallbladder

Lysis is the process of disintegration or dissolution.

Lysate is the product of lysis.

To Lyse is the act of lysis.

Autolysis is the disintegration of tissues after death.

Lysosome is a membrane bound cellular organelle that contains various hydrolytic enzymes.

A suffix that denotes an abnormal status of an organ or tissue is (**osis**).

For example **hemarthrosis** is blood in the joint cavity; **Osteoarthritis** is a degenerative disease of joints. (OA).

- 
- **Neurosis** is a personality disorder as in anxiety states, phobias, obsessions, etc. العصاب
 - **Psychosis** is fundamental mental derangement characterized by defective or lost contact with reality for example in mania and endogenous depression. الذهان

A suffix that indicates a process of formation is **(poesis)**, for example:

Erythropoesis is the formation of red blood cells.

Another suffix that indicates formation is **(genesis)**, for example:

Spermatogenesis is the process of formation and maturation of spermatozoa.

- 
- **Exacerbation** is an active episode of a chronic disease or illness.
 - **Remission** is the amelioration or disappearance of symptoms or activity in a chronic disease as in rheumatoid arthritis.

Hemorrhage means bleeding.
exile

Hemoptysis is the spitting of blood with expectoration.

Melaena is the passage of black tarry stools in upper gastrointestinal tract bleeding due to decomposition of hemoglobin of blood.

- **Epistaxis** is nose bleeding. *not exicise*

-

- **Diarrhoea** is the increased frequency of bowel motions.

- **Nausea** ¹³¹ means a stomach distress with distaste for food and an urge to vomit.
غثيان.

-

Stenosis indicates a narrow aperture or passage.

Mitral valve stenosis in chronic rheumatic valvulitis.

Stenosis of a segment of small intestine due to a tumor, tuberculosis, etc.

Incompetence is failed performance or function as in mitral valve incompetence due to chronic rheumatic valvulitis.

Alopecia is the loss of hair. Alopecia areata is a skin disease characterized by near total loss of hair in one or several circumscribed areas.

- **Urticaria** is an allergic skin reaction characterized by erythema (redness), swelling and pruritis (itching).

- 
- **Syncope** is a fainting attack. It can be induced by temporary cerebral ischemia by sudden drop in blood pressure in vasovagal stimulation due to severe pain, fear, etc.

Bio = Life.

Biology is the science that studies life.

Biopsy is taking a live tissue sample for pathological study.

Necro = Death.

Necrosis is pathological localized death of tissue.

Necropsy is postmortem examination.

Other Types of Terminology

- **Acronyms-** terms that stand for longer phrases

ex.: COPD- chronic obstructive
pulmonary disease

ex. AIDS- acquired immunodeficiency
syndrome

- 
- **Eponyms-** named after people

Ex. Parkinson's Disease

- **Abbreviation-** shortened form of word.

ex. mL- milliliter

Acronyms from warm-up

- CBC-
-complete blood count
- ECG
-electrocardiogram
- CXR
-chest x-ray
- ABG
-arterial blood gas
- Stat
-at once immediately

EKG
EMG

)
