

MEDICAL TERMINOLOGY

OBJECTIVES

- The student will be able to properly use the terms in different medical fields
- The students will be exposed to more definitions and terms used in different medical departments

An antispasmodic drug is one that relieves spasm.

Ache = Pain.

Backache is pain in the back. **Headache**, **toothache**, etc.

- **Tripsy** is the intentional crushing as in lithotripsy that is fragmentation and crushing of stones.

- **Tropic, tropism:** Affinity for... ((رانجرب))
Neurotropic or hepatotropic viruses.
Epidermotropism... affinity to epidermis.

Trophy: Growth, nutrition. Ex. trophic hormones or factors.

Adrenocorticotrophic hormone stimulates the adrenal cortex to secrete its hormones.

- **Trophoblast** is that layer of placenta that is responsible for implantation and nutrition of the embryo.
- **Trophozoite** is the vegetative form of a protozoan as opposed to the resting or reproductive form.

Atrophy: Decrease in size or wasting away of a tissue or part of a body. *the number of muscle fibre is koncinent*

Ex. Muscle atrophy after prolonged immobilization.

Hypertrophy: Increase in size of an organ or tissue *without multiplication* of its *constituents*

Ex. Exercise induced muscular hypertrophy.

because .if it multiplaybe it will be a concer than

Pores: A minute opening...Ex. Millipore filters.

Hidro: sweat (**Hidradenoma** is a benign tumor of sweat gland origin;

Hidradenitis is inflammation of sweat glands).

Kinesis: Movement -(**dyskinesia**: difficulty in movement; **kinetic energy** is energy associated with motion).

- **Auditory:** Related to **hearing**. Ex. Auditory nerve.
- **Meatus:** A natural body **passage** or opening. Ex. auditory meatus.
- **Ox/o:** Presence of oxygen. Ex. **Anoxia:** deficiency of oxygen;
- **Hypoxemia** is low oxygen tension in blood.

hypoxemia

Bacterio/o: Related to bacteria. Examples:

Bacteriology is the science that studies bacteria.

Bactericidal: Bacterial killing drugs. *it is a type of antibiotic*

Bacteriostatic drugs are drugs that **arrest** bacterial proliferation like tetracyclins.

Carcin/o: Related to cancer. Examples:

Carcinogenic substances are substances that induce cancer like the **tar** in cigarette smoke.

Carcinogenesis is the process of cancer induction.

Onco: Related to tumor;

Oncogenic viruses are viruses that induce tumors like **Human papilloma virus**, **Epstein Bar virus**;

Hepatitis B virus.

Oncologist is a physician specialized in treating tumors.

Etio: cause Examples:

Etiology of a disease is its cause.

Etiological classification is one that is based on causes.

Gravid: Pregnancy. Examples:

Primigravida is a lady in her 1st pregnancy.

Gravid uterus is a pregnant uterus.

- **Litho**: stones.
 - **Cholelithiasis** are biliary passages and gallbladder stones.
 - **Urolithiasis** are stones of the urinary tract.
 - **Lithotomy** is to remove a stone surgically.
- 

AERO = Air.

Aerobic bacteria need air or oxygen while anaerobic bacteria can grow in absence of air or oxygen.

BARO = Pressure.

Barometer is a pressure- measuring device.

Baro-receptors are those sensitive to the changes in pressure.

CHRONO = Time

Chronic inflammation or illness is one of long duration.

Chronophobia is fear of time seen in prisoners.

Chronological order of events is in order of time or age.

-

ELECTRO = Electricity

Electrocardiogram is an instrument that displays the electrical impulses generated by the heart.

Electrocution is death by exposure to a high electric current.

ERGO = work.

Ergonomics are the rules of work.

Ergophobia is fear of work including surgical operations.

- **ACRO** = Extremity, top part, height.
- Acrophobia is fear of heights.
- Acrodermatitis is inflammation of the skin of acral parts of the extremities including tips of fingers and toes, tip of the nose and pinna of the ears.

IMMUNO = safe, protect.

Immunity is protection from disease.

Immunological diseases result from derangement of the immune system.

Immunodeficiency disorders result from lack or disorder of immune responses as in **AIDS** (Acquired immune deficiency syndrome resulting from infection of T lymphocytes by HIV-I).

- **MYCO = Fungus.**

- **Mycology** is the science concerned with the study of

{ **viruses.** } لا تنكح « جراثيم »

- **Mycological culture** media are used to grow fungi in vitro e.g. Sabraud's medium.

PATHO = Disease

Pathology is the study of causes and effects of disease.

Pathogenic viruses are disease-causing viruses.

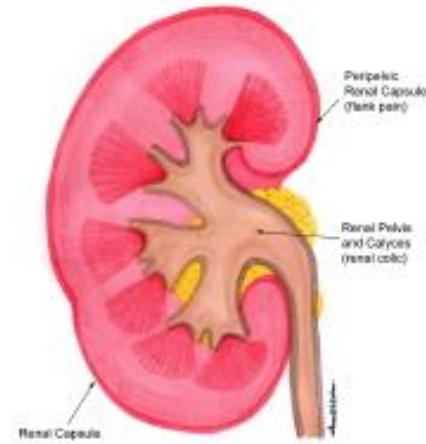

PYO = pus

Pyogenic infections are infections by pyogenic bacteria.

Purulent discharge is yellowish thick and viscid pus containing discharge.

Pyonephrosis is distention of the pelvi-calyceal system of the kidney by pus.

Sepsis = Infection

Septicemia is bacterial proliferation in blood.

Antiseptics are chemical used to kill infective microorganisms.

Toxic/o = Poison.

Toxemia is the circulation of toxins in blood stream.

Antitoxin is a substance that counteracts the effect of a toxin.

PYRO = Related to fever.

Pyrogen is a fever inducing substance.

Pyrexia is fever.

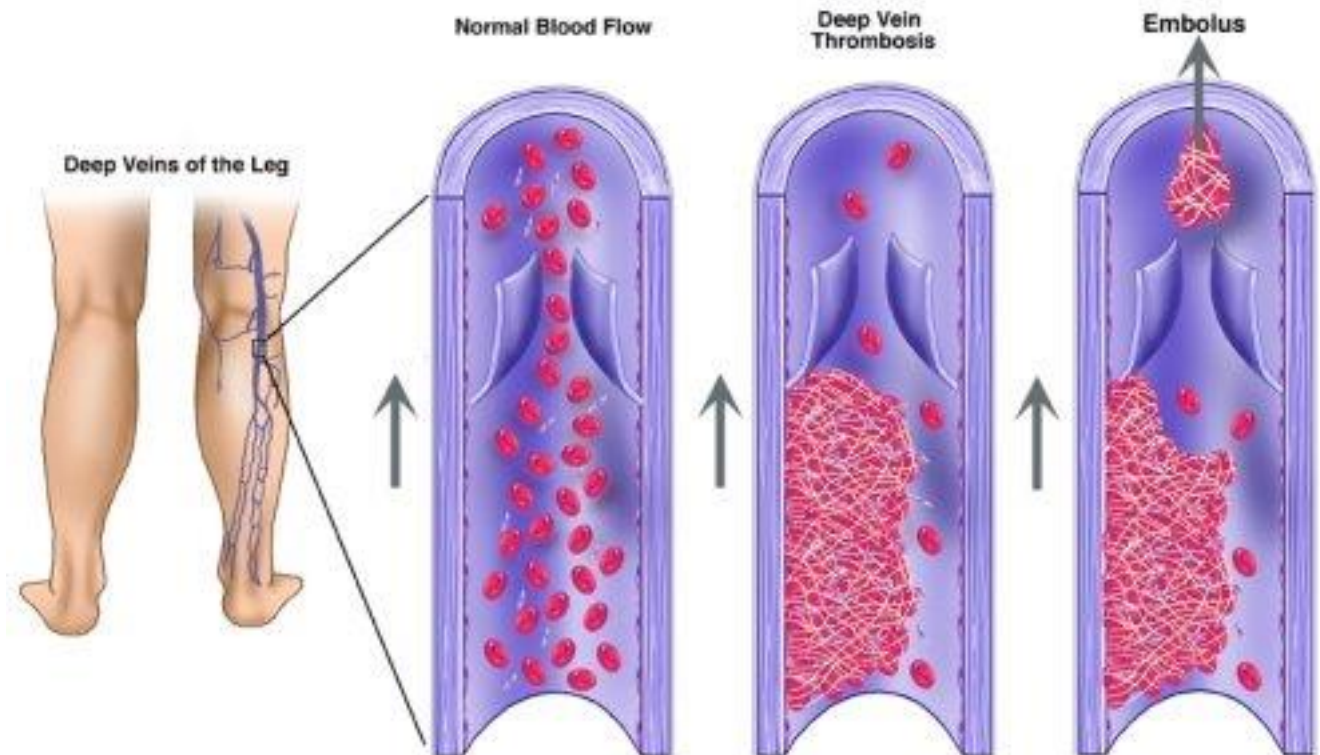

Antipyretic is a drug that lowers high body temperature.

THROMBO = related to coagulation.

Thrombosis is coagulation of blood.

Thrombus is a **solid mass** derived from blood constituents (fibrin and entangled blood cells that arrests bleeding from injured blood vessel).

- **Thrombocytes** are the platelets, the cells concerned with coagulation
- **Thrombocytopenia** is reduced platelet count in peripheral blood.
- **SPERMATO = Related to sperms**
- **Spermatogenesis** is the process of development and maturation of germ cells into spermatozoa.
- **Aspermia** is absence of spermatozoa in semen.
- **Oligospermia** is low sperm count in semen.

THANK YOU
